

HSA Preventive Drug List

Accord™ Formulary

Introduction

Certain preventative medications can be obtained at zero or low cost before the deductible is satisfied depending on your specific plan documents. Medications must be covered by your plan to be eligible for the preventive medication program – not all strengths and dosages will be covered. To check the cost of a medication, contact customer service using the toll-free member phone number on your ID card.

Quality Driven and Cost-Conscious Medications

As the pharmacy benefit manager, Prime and Magellan Rx strives to offer you access to a broad choice of medications at a reasonable price. The HSA Preventive Drug List contains products that meet the interpretation of the U.S. Department of the Treasury and Internal Revenue Service (IRS) guidance for plans with Health Spending Accounts (HSAs) and qualified High Deductible Health Plans (HDHPs). This is not inclusive of all preventative medications, does not guarantee coverage by your pharmacy benefit, is intended as a reference, and is subject to change throughout the year.

Proactive Therapy

Preventive medications help protect against or manage a medical condition. They may provide prenatal care, prevent osteoporosis, or reduce risk of blood clots, stroke, and heart disease. Taking preventive medications as directed by your doctor can help avoid serious health problems. That may mean fewer doctor visits and hospitalizations, reducing your total health care costs.

Money Saving Generics

To get the most from your benefits, ask your doctor if there's a generic medication that's right for you. Generics normally cost less than brand medications, and the Food and Drug Administration (FDA) requires them to be just as safe and effective.

Questions?

If you have questions or would like additional information on the HSA Preventive Drug List, please contact customer service at the toll-free member phone number on your ID card.

A list of covered preventive medications begins on the next page. Medications are listed by therapeutic category.

KEY:

Generics: Lowercase italic. Example: *albuterol sulfate*

Brands: All capital letters. Example: VENTOLIN HFA

This list may not be all inclusive. This list is subject to change. New-to-market products and variations of those products will not be added to this list until they have been evaluated and approved by Prime Therapeutics. Please discuss with your health care provider before you switch any medications to ensure clinically appropriate use. This list is not intended to dictate to physicians how to practice medicine or intended to replace the judgement of your physician. Prime Therapeutics is not liable for any treatment administered or prescribed as a result of this information. Additional restrictions may apply. Neither this document, nor the successful adjudication of a pharmacy claim, is a guarantee of payment. Please refer to your member guide for detailed information regarding your pharmacy benefits, including your benefit design, out-of-pocket costs, prior review, and restricted access medication requests, and applicable exclusions. For more information, please contact your Prime Therapeutics representative. All brand names are the property of their respective owner.
